PROFESSIONAL SUMMARY_____

Detail-oriented software engineer with a knack for lateral thinking and getting the job done in the fastest possible and most efficient way. With experience bordering on a decade, I have been able to expertly hone my skills on requirements definition, design and implementation of full-stack web and mobile applications.

EXPERIENCE_____

Monovo   **May 2021 - Present**
Mobile Tech Lead
- Rebuilding the Monovo Patient App with newer and more scalable technologies
- Managing the Mobile team as a sub technical lead.
- Technologies used: Kotlin, Jetpack Compose, Firebase

BuyPower   **March 2020 - May 2021**
Software Developer
- Building and updating the BuyPower Web app used by thousands of Nigerians every day.
- Rebuilt the BuyPower mobile app to eliminate customer pain points and increase conversion.
- Technologies used: ReactJS, Flutter, Kotlin

myFlex.africa   **June 2019 - December 2019**
Android Developer
- Built Telehost, a cloud solution that allows internet vendors and travelers to eliminate the need for exorbitant roaming charges
- Technologies used: Kotlin, Retrofit

Hotels.ng   **March 2019 - June 2019**
Android Developer Intern
- Worked on a team to build Apoe 4, a mobile solution to make living with Alzheimer's disease a little easier.
- Technologies used: Kotlin, Firebase, MVP

CRSL   **February 2019 - July 2019**
Remote Android Developer
- Built the operation app for Jhaki, an Uber for Logistics.
- Technologies used: Java, Retrofit, MVP

Colab   **June 2018 - September 2018**
Android Developer Intern
- Customized Route, a white-label Taxi-hailing app to fit the Kaduna market. Integrated a local payments processing system.
- Technologies used: Kotlin, Retrofit, MVP

EDUCATION

Ladoke Akintola University of Technology   **Graduation Date: Jan 2020**
Bachelor of Technology in (BTech) Computer Science (CGPA: **4.04/5.00**)

Lambda School   **Graduation Date: Feb 2020**
Full Stack Web Development and Computer Science

VOLUNTEERING

Andela Learning Community   **April - September 2019**
- Mentorship, Leadership Role - Assisted students over course content, tracking progress and providing further explanation where necessary.

COSEMS LAUTECH   **October 2015 - March 2016**
- Leadership role - Documented association's activities.
- Developed a mobile solution to keep track of members' contributions and attendance at meetings.
- Technologies used: Java, Firebase

ACHIEVEMENTS

KadHack 2018 Competition   **September 2018**
Co-winner, 1st place

ONLINE COURSES
- Psychology of Design
- Basics of Golang
- Flutter and Dart

SKILLS

Native Android Development - Kotlin, Jetpack, Compose, and Java.
Frontend Web Development - HTML, CSS, LESS, Styled Components, Javascript, Reactjs, Redux, and Formik.
Backend Web Development - Firebase, Node, Express, Jest, Espresso, Unit testing, Postgres, and Heroku.
Hybrid Android Development - Flutter
Desktop App Development - Java, JavaFX, Kotlin, TornadoFX.
Tools - Linux, Unix, Windows, Git, VsCode, and Vim.
